Dear Customer,

We are pleased to announce that Daikin Europe N.V obtained the Eco-label for the Altherma™ air to water, air source, heat pump system.

The Eco-label represents products in the top of their class concerning environmental performance and is recognisable by its distinctive flower logo.

From
Space Air Solutions

First in industry sector!

Altherma™, has been awarded the Eco-label:

Eco-label is a European Scheme to verify a product's higher efficiency and environmental performance. Daikin Europe NV is the first in it's sector to obtain this classification.

In being awarded the EU Eco-label, Altherma™ manufactured by Daikin Europe NV, and supplied by Space Air, was assessed in a range of categories:

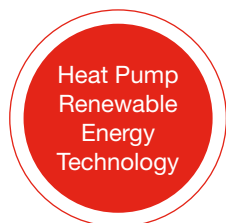

- heating efficiency
- refrigerant global warming potential (GWP)
- noise
- absence of RoHS substances
- training
- documentation
- 10 years availability of spare parts
- detailed information at point of sale.

The bottom line: Altherma™ has higher energy efficiency and less global warming impact than other heat pump products in its class.
